

BELZONA®
4111
M A G M A - Q U A R T Z

Long Term Reclamation and Protection of Concrete

Concrete is vulnerable to attack from abrasion, impact, vibration and chemicals. Because of its porous nature and the weak electronic forces which hold the individual cement crystals together, all concrete deteriorates.

Belzona® 4111 (Magma-Quartz) is the proven, long term solution for the repair and protection of concrete. Belzona® 4111 (Magma-Quartz) has outstanding versatility in application, allowing rebuilding, screeding, bonding or grouting to suit specific situations and offering resistance to abrasion, impact, vibration and chemical attack.

Designed for excellent performance and ease of application, Belzona® 4111 (Magma-Quartz) has outstanding:

- ADHESION
- STRENGTH
- HARDNESS
- CHEMICAL RESISTANCE

Ideally suited for horizontal surfaces, the system may also be applied on vertical substrates up to 1/4 inch (6 mm) thickness, including:

- Steel and other metal substrates,
- Concrete surfaces subject to chemical attack,
- Areas subject to extreme wear, impact and abrasion, and
- Concrete, brick, marble and stone structures.
