

SUBMERSIBLE BOREHOLE PUMPS SERVICE

Our company can provide a comprehensive service for the above pumps of most manufacturers including Lowara, Grundfos, Ingersoll Dresser, Weir, etc.

Our services include:-

- Removal from borehole
- On site repairs
- Test and certify
- Supply new units
- Re-install in borehole

We believe, our company is unique in providing this complete comprehensive range of services.

We are fully aware of the importance to keep plant operational with minimal disruption and hence, provide a 24 hour on site service to meet any requirements.

We have the capability to repair all units using manufacturers original parts and the added advantage to test and certify units against the manufacturers specification using our in house test facilities. This gives confidence to our customers that the units are fully functional prior to delivery and re-installation.

For further information or if you have any queries please do not hesitate to contact us accordingly.
