

BELZONA® 1321 INJECTS NEW LIFE INTO OLD SHAFT

CUSTOMER

Brewery in Lancashire UK

APPLICATION DATE

September 2003

APPLICATION SITUATION

3 diameter shaft on the canning line of a local brewery

PROBLEM

A collapsed bearing had caused excessive wear to the shaft necessitating either a full repair or replacement.

PRODUCTS

Belzona® 1321 (Ceramic S-Metal)

SUBSTRATE

Mild Steel

APPLICATION METHOD

Application carried out in accordance with Belzona Know-How System Leaflet MPT-2.

BELZONA FACTS

Replacement of the shaft was considered the only alternative - the problem being it was costly and time consuming, around £20,000 (\$40,000) for a new shaft and five days of downtime. The Belzona solution was carried out in under one shift period thanks to the ability of Belzona to be post-cured and is still working today.
